OBJECTIVE

Final-year Information Technology student seeking to pursue a Master's in Computer Science, specializing in Artificial Intelligence and Data Systems, in the United States. Built and deployed AI and full-stack applications — including a real-time facial recognition system and a secure student management platform — through academic projects and industry internships. Research interests: applied machine learning, computer vision, and secure data systems.

EDUCATION

Government College of Engineering, Erode — Anna University | Expected May 2027

Bachelor of Technology in Information Technology | CGPA: 8.57/ 10.0 (upto 6th semester)

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Computer Networks, Operating Systems, Human-Computer Interaction, Artificial Intelligence, Industry 4.0 & IIoT

ACADEMIC & TECHNICAL PROJECTS

Smart Face Recognition Attendance System | Python, Flask, OpenCV, SQLite

- Designed and implemented a real-time attendance system using OpenCV-based facial detection and recognition, integrated with a Flask backend and SQLite database, achieving [accuracy]% recognition accuracy across [number] test subjects.
- Tuned detection thresholds and preprocessing steps to reduce false matches across varied lighting conditions, cutting attendance-marking time by roughly [X]% compared to manual roll-call.

College Connect — Student Management Portal | HTML, CSS, JavaScript, Firebase

- Built a full-stack student management portal with Firebase Authentication for secure login and Firestore for real-time storage, supporting [number] student records with sub-[X]-second data sync.
- Designed the front-end interface and data schema independently, from requirements through deployment.

INTERNSHIP EXPERIENCE

AI & Data Science Intern — TVK Technologies | 2026 – [View Certificate](#)

- Extended the facial recognition attendance system into a deployable internship project, applying Python and OpenCV in a professional development workflow.
- Collaborated with mentors on debugging, testing, and documenting the AI pipeline for real-world reliability.

Cyber Security Intern — Xplore IT Corp, Coimbatore | Jun – Jul 2025 – [View Certificate](#)

- Performed network vulnerability scans across [number] test environments and assisted in identifying and documenting [number] security gaps.
- Learned and applied fundamentals of network security, including common attack vectors and basic system hardening practices.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript

Web Technologies: HTML5, CSS3

Databases: MySQL, MongoDB, Firebase Firestore

Tools & Platforms: Git, GitHub, Linux (Ubuntu), Visual Studio Code, Excel, Power BI

CERTIFICATIONS & ONLINE COURSES

- NPTEL Elite – Human Computer Interaction (Score: 93%), 2026 – [View Credentials](#)
- Python for Beginners – Udemy, 2026 – [View Credentials](#)
- NPTEL Elite – Industry 4.0 & Industrial Internet of Things (Score: 80%), 2025 – [View Credentials](#)
- Java Programming Fundamentals – Infosys Springboard, 2025 – [View Credentials](#)

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Documentation Team Member, FOSS GCEE — contributed to technical documentation and supported open-source community events on campus.
